

Keeping up the pressure

Pressure Transmitters and Digital Pressure Gauges manufactured to exacting Swiss standards by Keller-Druck.

Pressure Transmitters Series 211

- LOW COST
- Suitable for the harshest industrial environments
- Extremely small temperature error.
- Pressure ranges available from 1BAR to 1000BAR.
- Outstanding immunity to electro-magnetic fields.

- High immunity to external voltages between the housing and the electrical design.
- Loop Powered with 4 – 20 mA output.

Pressure Gauge Leo 2

- HIGH ACCURACIES of < 0,1% FS at room temp.
- For demanding monitoring tasks indoors and outdoors.
- Pressure measured twice/sec – displayed as actual and Min/Max since last reset
- Ranges: -1 to 3BAR up to 0 – 700BAR
- Swivel pressure connection for easy viewing

Instrotech, a Comtest Group Company, supplies a complete range of in-house designed and manufactured digital panel meters and DIN rail mount transmitters for connection to Keller Transmitters, as well as hand held Calog pressure calibrators which include mV and voltage measurement and mA sourcing. Customized briefcase sets with a selection of pressure transmitters can be made up as kits.
