

## **WIRE-ACTUATED ENCODER WITH DOUBLE POTENTIOMETER TECHNOLOGY AVAILABLE FROM INSTROTECH**

Comtest Group Company and specialist in instrumentation Instrotech, now offers Siko's compact wire-actuated encoders with double potentiometer technology for reliable linear position measurement. The SG32 can be used in a wide range of applications, even in difficult conditions. Measuring lengths is up to 3000mm.

With the introduction of this new encoder range, Siko sets advanced standards in terms of flexibility, easy installation and safety. Operation in temperatures of -40°C and a robust design that makes the device suitable for use in wet and dirty environments ensures a high degree of protection and guarantees durability and maintenance-free functionality. The device has a closable aeration hole to avoid condensation. The special redundant sensors used to monitor the rotation of the drum, provides improved safety.

The SG32 can be supplied with various mounting options to suit application requirements.
